WAKE UP CALL

FOUR YEARS OF LIFE LOST *to* LONG COVID.

THURSDAY MARCH 14 GIVE CONGRESS A WAKE-UP CALL.

We're contacting Congress to let them know that Long Covid is not going away – so neither are we.

Visit democracy.io and enter your zip code to find your Congresspersons' contact info.

LONG COVID ISN'T GOING AWAY... SO NEITHER ARE WE.

"My name is _____ and I am your constituent.

Like millions of other Americans, I have Long Covid.

This Friday, March 15, is Long Covid Awareness Day – an observation of four years of suffering while patients wait with no treatments, cures, or hope.

After two years, only 8% of Long Covid patients have regained their health.

We need a Moonshot for Long Covid – \$1b per year for 10 years –to fast-track the path to treatments and cures.

Can we count on [Name]'s support?"

IF YOU CAN, SHARE YOUR STORY.

Your lived experience matters – and can make a big impact. Sharing a few words about the time you've lost, how your life has changed, and what you wish you were doing now can paint a picture that touches people. Don't be intimidated, just speak from the heart!

FAST FACTS, MARCH 2024

Long Covid currently affects **1 in 15** American adults.

Over 700,000 people have left the workforce due to Long Covid – a mass-disabling event.

The journal *Pediatrics* estimates that **5.8 million American kids** suffer with Long Covid.

Long Covid is not just continued Covid symptoms. It also creates **new-onset conditions, systemic dysfunction, organ damage, and cognitive injury.**

90% of people who develop Long Covid had a mild initial illness.

There are **0 approved treatments** for Long Covid.

WHAT CAN I SAY IF I'M AN ALLY?

"My name is _____ and I am your constituent.

Like millions of other Americans, I have a [friend / loved one / family member] with Long Covid.

This Friday, March 15, is Long Covid Awareness Day – an observation of four years of suffering while patients wait with no treatments, cures, or hope.

After two years, only 8% of Long Covid patients have regained their health.

We need a Moonshot for Long Covid – \$1b per year for 10 years –to fast-track the path to treatments and cures.

Can we count on [Name]'s support?"

EMAILING CONGRESS DO IT WRITE

MARCH CALL ACTION FAQ

**Long Covid Awareness Day is on March 15.
Why are you calling on March 14?**

Many people are hosting and attending Long Covid advocacy events on LCAD; others may wish to spend it in quiet commemoration. We're calling Congress on Thursday to respect the day itself.

What if I don't agree with something specific suggested in the Call Guide?

Take what you can use, and leave the rest. Every advocate for Long Covid who raises their voice for awareness is a win for us all. The most important message is that Long Covid is real and is not going away without attention, research, & treatments.
